

What You Need To Succeed in Mrs. Webber's Class (if you want to pass!)

1. You ALWAYS must have a pen or a pencil.
2. You ALWAYS will need loose-leaf paper, to use you pen or pencil on.
3. You will need a dedicated class notebook, to put your loose-leaf paper and handouts in.
4. A simple calculator, because math is the language of science. You may NOT use your cell phone.
5. A box of (at least) 12 crayons, because science is not done in black or white.

These are simple, but necessary, requests. Remember, science is not learning what to think, it is learning how to think, and tools and attitudes help to expand that thinking.
